

Justin Duance Quotes

“Favourite place...In the sea with an offshore breeze and a perfect swell running.”

“I don’t consider myself an artist. Because my pieces are made to be worn, there is always a thought for how they will wear and if people will buy them. My mission was always to create interesting contemporary jewellery at an affordable price. I don’t think it just needs to be available to the rich or held on a pedestal in a gallery.”

“Jewellery is often well loved and valuable to its owner even if it came from a cheap market stall on holiday. I want to create treasures that are treasured by their owners because the pieces mean something personal to them. “

“It is the way objects are made that is intrinsic to my conceptions. The contrast in the way two different materials come together as they do in nature, or the structure underlying natural objects that creates a whole form is what I find beautiful. Using these natural materials also gives an object meaning that is deeper than its form.”

“Success is what ever you want it to be. I think I have made a success of it. I am very aware that it could all go wrong at any time and I am very grateful that people still like my work and that I have such an amazing team of people working for me.”
